EDUCATION

Bachelor of Commerce – Business Technology Management (Honours) *Sep 2022 – Apr 2026*
Seneca Polytechnic, Toronto, ON
Relevant Coursework: Business Systems Analysis, Database Management, Advanced Data Analytics, Accounting, Finance, Statistics, GAAP/IFRS, PIPEDA/HIPAA, IT Audit, Risk Management, Project Management

SKILLS

Data and Analytics: SQL, Python, Excel (Pivot Tables, Power Query, XLOOKUP, VBA), Power BI, Tableau, ETL, Data Validation, KPI Reporting, Dashboard Development
Finance and Accounting: GAAP, IFRS, ASPE, Accounts Payable/Receivable, Tax Compliance, Reconciliation, Financial Reporting, QuickBooks Online (ProAdvisor Certified), SAP
Business Analysis: Requirements Gathering, Process Mapping, Gap Analysis, Stakeholder Management, User Stories, Agile, Jira, Confluence
Tools & Other: Microsoft Office Suite, SharePoint, Salesforce, Google Analytics 4, PIPEDA/HIPAA compliance, Salesforce CRM

WORK EXPERIENCE

Finance, Accounting & Tax Specialist (Volunteer) – NeedList.org, Toronto, ON *Jun 2025 – Aug 2025*
- Built a multi-province tax credit calculator (BC, AB, ON) solo in Excel using XLOOKUP, VLOOKUP, IF, and IFERROR, validated against 20 scenarios and cross-referenced directly with CRA, reducing calculation errors.
- Co-filed T3010 charity tax return and standardized audit-ready reconciliation documentation, cutting revision cycles by 30%; presented methodology to CEO, managers, and developers.

Entrepreneur-in-Residence (HELIX Co-op) – Seneca Polytechnic, Toronto, ON *May 2025 – Aug 2025*
- Coordinated with 5 manufacturers and 3 suppliers; tested 10 prototypes and benchmarked 12 competitors (ChefWorks, Bragard, Tilit) to develop pricing strategy and financial forecast model.
- Built an intake workflow handling 25 weekly requests and standardized supplier tracking, reducing missed deliverables by 20% and improving turnaround time by 30%.

Customer Service Representative – Seneca Polytechnic, Toronto, ON *Aug 2024 – Present*
- Resolved 30–40 customer inquiries per shift; documented cases in Excel and coordinated escalations with clear issue summaries, increasing same-day resolution by 20% and reducing repeat follow-ups by 25%.
- Documented cases in Excel and troubleshot issues before escalation, reducing repeat follow-ups by 25% and improving turnaround time by 15%.

Crew Member – Bingz, Markham, ON *Dec 2022 – Aug 2024*
- Processed 80+ daily transactions via POS, balanced end-of-shift cash totals, and trained 8 new hires on service standards, improving service consistency by 10%.
- Reduced peak-time delays by 25% by coordinating order handoffs and resolving issues in real time, maintaining accurate cash and card payment records throughout each shift.

PROJECTS

YEES Energy – Project Cost-Benefit Analysis *Nov 2023 – Jan 2024*
- Extracted and validated 10,000+ utility records using SQL and Excel reconciliation, producing analysis-ready tables; built Power BI KPI dashboards quantifying $15.4M in potential savings across building types.
- Modelled energy reduction scenarios by property category, identifying 29–34% cost reduction potential across highest-intensity segments to support executive decision-making.

Credit Risk Loan Default Analysis *Jan 2026 – Feb 2026*
- Automated Python data preparation for a loan default dataset (type fixes, null handling, risk feature engineering), cutting prep time by 50%; identified high-risk segments with 2x higher default incidence via debt-to-income and income-tier analysis.
- Visualized risk segmentation in interactive Tableau dashboards, improving interpretation speed by 35% during stakeholder review.

Hospital Length of Stay Analysis *Jan 2026 – Feb 2026*
- Validated 300,000+ hospital encounter rows in SQL (null, duplicate, range checks) and analyzed LOS drivers by age group and admission type in Power BI, reducing drill-down time by 40%.
- Modelled cohort comparisons across age group and admission type, prioritizing the top 3 segments with the highest average length of stay to guide operational planning.

Tesla Production & Deliveries Analysis *Nov 2025 – Dec 2025*

- Standardized a 2015–2024 production dataset in Excel and built refreshable Tableau KPI views, cutting manual reporting time by 30%.
- Developed a management-ready PowerPoint from Tableau outputs explaining year-over-year changes, reducing follow-up questions by 25% through clearer KPI storytelling.

CERTIFICATIONS

Data Analytics – BrainStation (Jan 2024) | SQL for Healthcare Professionals – LinkedIn Learning (Oct 2024) | Google Analytics 4 – Google (Feb 2026) | QBO ProAdvisor Certified (Mar 2026) | Salesforce CRM Trailblazer Badge (Mar 2026) | CompTIA A+ CertMaster Learn (In Progress)
