SUMMARY

Business Technology Management graduate with expertise in SQL, Python, Excel, Power BI, and Tableau. Experienced in financial reporting, data analysis, business requirements, and KPI dashboards supporting finance, accounting, and operations decisions.

EDUCATION

Bachelor of Commerce – Business Technology Management (Honours)

Sep 2022 - Apr 2026

Seneca Polytechnic, Toronto, ON

Relevant Coursework: Business Systems Analysis, Database Management, Advanced Data Analytics, Accounting, Finance, Statistics, GAAP/IFRS, PIPEDA/HIPAA, IT Audit, Risk Management, Project Management

TECHNICAL & PROFESSIONAL SKILLS

Data and Analytics: SQL, Python, Excel (Pivot Tables, Power Query, XLOOKUP, VBA), Power BI, Tableau, ETL, Data Validation, KPI Reporting, Dashboard Development

Finance and Accounting: GAAP, IFRS, ASPE, Accounts Payable/Receivable, Tax Compliance, Reconciliation, Financial Reporting, QuickBooks Online (ProAdvisor Certified), SAP

Business Analysis: Requirements Gathering, Process Mapping, Gap Analysis, Stakeholder Management, User Stories, Agile, Jira, Confluence

Tools and Other: Microsoft Office Suite, SharePoint, Salesforce, Google Analytics 4, PIPEDA/HIPAA compliance, Salesforce CRM, Generative AI, Prompt Engineering

WORK EXPERIENCE

Finance, Accounting & Tax Specialist (Volunteer) – NeedList.org, Toronto, ON

Jun 2025 - Aug 2025

- Built a multi-province tax credit calculator (BC, AB, ON) solo in Excel using XLOOKUP, VLOOKUP, IF, and IFERROR, validated against 20 scenarios and cross-referenced directly with CRA, reducing calculation errors.
- Co-filed T3010 charity tax return and standardized audit-ready reconciliation documentation, cutting revision cycles by 30%; presented methodology to CEO, managers, and developers.

Entrepreneur-in-Residence (HELIX Co-op) – Seneca Polytechnic, Toronto, ON

May 2025 - Aug 2025

- Coordinated with 5 manufacturers and 3 suppliers; tested 10 prototypes and benchmarked 12 competitors (ChefWorks, Bragard, Tilit) to develop pricing strategy and financial forecast model.
- Built an intake workflow handling 25 weekly requests and standardized supplier tracking, reducing missed deliverables by 20% and improving turnaround time by 30%.

Customer Service Representative – Seneca Polytechnic, Toronto, ON

Aug 2024 – Apr 2026

- Resolved 30–40 customer inquiries per shift; documented cases in Excel and coordinated escalations with clear issue summaries, increasing same-day resolution by 20% and reducing repeat follow-ups by 25%.
- Documented cases in Excel and troubleshooted issues before escalation, reducing repeat follow-ups by 25% and improving turnaround time by 15%.

Crew Member – Bingz, Markham, ON

Dec 2022 - Aug 2024

- Processed 80+ daily transactions via POS, balanced end-of-shift cash totals, and trained 8 new hires on service standards, improving service consistency by 10%.
- Reduced peak-time delays by 25% by coordinating order handoffs and resolving issues in real time, maintaining accurate cash and card payment records throughout each shift.

PROJECTS

YEES Energy – Project Cost-Benefit Analysis

Nov 2023 - Jan 2024

- Extracted and validated 10,000+ utility records using SQL and Excel reconciliation, producing analysis-ready tables; built Power BI KPI dashboards quantifying \$15.4M in potential savings across building types.
- Modelled energy reduction scenarios by property category, identifying 29–34% cost reduction potential across highest-intensity segments to support executive decision-making.

Credit Risk Loan Default Analysis

Jan 2026 - Feb 2026

- Automated Python data preparation for a loan default dataset (type fixes, null handling, risk feature engineering), cutting prep time by 50%; identified high-risk segments with 2x higher default incidence via debt-to-income and income-tier analysis.
- Visualized risk segmentation in interactive Tableau dashboards, improving interpretation speed by 35% during stakeholder review.

Hospital Length of Stay Analysis

Jan 2026 - Feb 2026

- Validated 300,000+ hospital encounter rows in SQL (null, duplicate, range checks) and analyzed LOS drivers by age group and admission type in Power BI, reducing drill-down time by 40%.
- Modelled cohort comparisons across age group and admission type, prioritizing the top 3 segments with the highest average length of stay to guide operational planning.

Tesla Production & Deliveries Analysis

Nov 2025 - Dec 2025

- Standardized a 2015-2024 production dataset in Excel and built refreshable Tableau KPI views, cutting manual reporting time by 30%.
- Developed a management-ready PowerPoint from Tableau outputs explaining year-over-year changes, reducing follow-up questions by 25% through clearer KPI storytelling.
